

Your Permanent Role in Higher Education

In the past year 210 Ohio University alumni have joined the ranks of Honor Members in their alumni association. This enthusiastic response is the best possible endorsement of the program, which benefits alumni both individually and as an organization.

If you have not become an Honor Member of the Ohio University Alumni Association, and have an active interest in your university, consider this new plan carefully.

Honor Membership brings a life-time subscription to The Ohio Alumnus magazine, a value which in itself saves money over a period of time. Yearly reports of university and alumni activities also go to Honor Members, and other special features will be added as the program progresses.

No less important, however, is the satisfaction which comes from regular support of higher education. Each \$100 invested in an Honor Membership returns an annual dividend to your alumni association. And your payment (or payments, if you prefer to pay \$25 in each of four consecutive years) is tax deductible.

Add your name to the list of Honor Members right away. Or establish an Honor Membership as a lasting memorial to the memory of a relative or friend. If you would like to know more about the plan before investing, write to the Alumni Office.

Rewards of Teaching

Ohio University's beloved professor emeritus, now 92,
looks back over his career as an educator
in this first of a series on the benefits of teaching as a profession.

WHEN I GRADUATED from college, 70 years ago, I had a choice, journalism or teaching. I was offered a position in New York to gather news from wool merchants and to write a weekly letter to the Boston Wool Reporter, at \$10.00 a week.

I turned the job over to a brilliant classmate who, while doing the work, finished a course in a law school. When I visited him years later he was paying \$3,000 office rent, but he died many years ago.

Insurance companies consider teaching a non-hazardous occupation. That

is one of the compensations.

For the first 3½3 years of my teaching my financial remuneration was so small that I am almost ashamed to mention it. But I had plenty to do—four classes in Latin from Caesar to Vergil, the odes and satires of Horace, classes in trigonometry and general history and later one in chemistry.

No movies in those days, my evenings were spent in getting ready for the tomorrow. In the latter portion of the last century, the "thing to do" if you planned graduate study was to go to Germany. So when my friend and his wife planned to go to Germany, taking their little daughter who later became professor of French for many years at Ohio University, my wife, who was now teaching in the same school as I, and I said we would go along. We saved our money and off we went to spend over a year in Europe, principally in Berlin.

Was it a wise move?

The actual knowledge I got from the lectures was small. Bliss Perry, editor of the *Atlantic*, with whom I had some correspondence said that "Zupitza could make any subject uninteresting", and with one or two exceptions I got a minimum of fact or culture from the Germany university. But outside the university every hour was instructive.

Beginning with a month at Cambridge attending the Summer School

Dr. Chubb

as guest, visiting the great art galleries of Italy, seeing Gladstone in Parliament, Queen Victoria in Florence, Bismarck in Berlin, spending 3 days in Pompeii, 3 weeks in Rome—all this was a wonderful experience.

And I did hear interesting lectures on Goethe and Schiller and got an interest in Goethe which gave me an incentive to develop a doctor's thesis on the subject, "Shakespere's Influence on Goethe", a big subject that would have terrified a wiser man.

My life as a teacher has been great fun. I have enjoyed being with young persons. It has kept me young in spirit. The financial reward has been adequate. I have made some foolish investments, but these have been offset by some wise ones. They say most persons on reaching the age of 65 are dependent on some one. I am over 90 and still afloat with head above water—so hail and farewell! It has been a good life!

It is Billy Phelps, the very popular English teacher at Yale, who said he enjoyed teaching so much that if there were no salary connected with it he would still like to teach. But I am sure the salary in no way detracts from the pleasure.

corner

F YOU LIVE anywhere in the vicinity of Boston, Massachusetts; Oxford, Ohio; Huntington, West Virginia; or Louisville, Kentucky, vou have an opportunity to take part in one of the most successful of all types of alumni events.

For two years the alumni association has been sponsoring informal gatherings at football games away from the campus. Some have attracted large numbers of alumni and others have not drawn well the first time, but all have proved enjoyable for those in attendance.

The meetings actually begin at the game, where Ohio University alumni have seats in a special section. By the end of the game, old friends usually have spotted each other and the reception that follows becomes a hearty get-together. The game itself, of course, creates the right atmosphere for a homecoming away from home.

Plans already have been made for gatherings at each of the out-of-town games of 1957. Toledo was not mentioned in the list because that game will have been completed by the time this column reaches vou.

Unless you are otherwise advised by mail, you can purchase game tickets for the Ohio University section at the regular stadium box office windows for the Miami. Marshall and Louisville games. For the Harvard game it is best to order them from the Ohio University Alumni Office to be assured of a seat in the special section.

Details of the reception for Ohio University fans will be announced at each game. In addition, the Alumni Office plans to notify alumni by direct

Incidentally, you can expect a good football game this year, Coach Carroll Widdoes has plenty of tricks under his new green and white cap, and his squad has the speed, size and enthusiasm to execute them. Even though the season has not yet started at this writing, and two games will have been played by the time you read it, I am predicting a startling reversal of last year's disappointing record.

The Harvard game on October 12 will be preceded by a noon luncheon for OU alumni at the Faculty Club of the Harvard Business School. The luncheon ticket (\$2.50) will also serve as a permit to park in the Faculty Club area, a five minute walk to the stadium. After the game a cocktail party will be held in the Harvard Club, downtown Boston, and will be followed by a dinner for adumni there. Price of the dinner is \$5.50 per person. A special note is that game time (2:00 p.m.) is Eastern Daylight Time.

The Miami event will feature an alumni roundup at the Anthony Wayne Hotel in Hamilton after the game, Price is \$2.00 per person, including refreshments. The October 19 game is Miami's Homecoming and Ohio University's Migration Day.

Plans for the Marshall and Louisville alumni gatherings have not vet been completed.

TWINS JOAN AND JUDY TRUPP OF TIPP CITY PREPARE SCHEDULES WITH COUNSELOR, HISTORY DEPT. PROF. CHARLES R. MAYES.

Counsel for Freshmen

ONE OF the most important decisions in a person's life comes in his first year of college. For it is then that he must determine the course he will follow as a career.

To be sure, the decision is not a positive selection that restricts him to one narrow path into the future. A university education must be broad enough to prepare its students for varied responsibilities as citizens.

But the decision a college freshman makes about his major field of study more often than not will be the determining factor in the selection of his life's work.

To help the beginning student discover his most advantageous interests and abilities, Ohio University constantly has built and improved a thorough counseling program. Based on the premise that counseling should be only a guide by which the student makes his final decisions, the program is designed for sucessful participation in college work, as well as in making the choice of a career.

Most recent development in coun-

seling at Ohio University is a pre-college orientation project, now in its third successful year. Conducted by the University College, which supervises all academic counseling, the program brings incoming freshmen to the campus in July or August, more than a month before the regular semester opens.

Each student attending the summer orientation remains on campus two days, taking tests, becoming acquainted with the university, and participating in other activities normally offered during freshman week. Those who do not attend one of the summer counseling sessions receive their orientation during freshman week, which is not eliminated but greatly supplemented by the summer program.

This year approximately three fourths of the freshmen made use of summer orientation.

Headed by Dr. Gaige B. Paulsen, dean of the University College, the summer pre-college counseling staff includes 15 members of the faculty. They represent the 270 faculty members who will serve as special counselors all during the school year.

Before the orientation begins these 15 faculty members meet with Dean Paulsen and Assistant Dean of the University College Bernard Black to discuss changes in curricula, requirements, and general university policies. At the beginning of the regular semester another meeting is held for all faculty counselors.

When the student arrives for the summer orientation he gets his first taste of college life by being assigned to a dormitory room. Parents are encouraged to accompany the students to the campus, but they are housed in separate quarters.

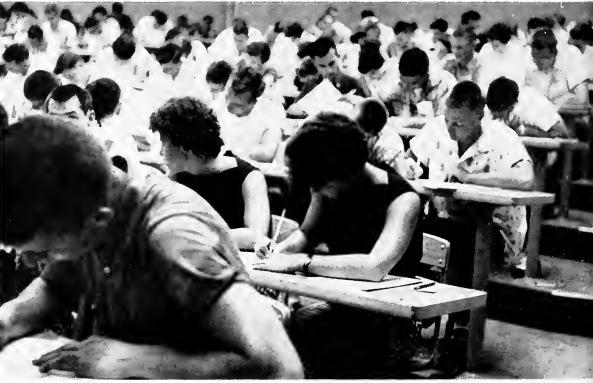

Reading, English and mathematics tests and the Ohio State Psychology Examination are given each student, with results computed immediately for use during the second day of counseling. These tests are to determine deficiencies and placements, not to serve

(Please Turn Page)

MEETING DEAN of University College, Dr. Gaige B. Paulsen, Joan, Judy and their parents, Mr. and Mrs. Franklin Trupp, begin two-day visit to campus for summer orientation.

TESTS IN reading, English and mathematics, ardinarily given during Freshman Week, are campleted at the summer session, along with the Ohio State Psychology Examination.

as entrance requirements, since any graduate of an accredited school in Ohio is eligible to enter a state university

Having completed the placement tests and several routine requirements such as posing for the familiar student 1. D. photographs, the freshmen proceed to small group meetings where they receive information about social life on the campus. In the evening they participate in this social life for the first time at a party conducted by upperclassmen.

During the second day the students attend more small group meetings, where faculty members discuss academic plans and objectives, the ROTC programs, interpretation of test scores and general directions for preparing class schedules.

Before the student completes his orientation through a conference with his counselor, he is able to prepare his own tentative schedule for the first semester. After a discussion with the counselor the complete schedule is made out and the student is ready for registration in the fall.

Anyone who graduated in the lower half of his high school class is screened for possible entrance on warning. If he receives a grade of less than 20 on the OSPE, he automatically goes on special warning. This means he will receive special attention such as vocational counseling and reduced loads until he shows that he can maintain a satisfactory grade average.

Parents too are given brief orientation concerning the campus, academic requirements, social life, counseling and reports they might receive concerning their children's grades.

Results of pre-college summer counseling are proving the value of the program. Having a month to consider the program he has outlined for himself, as well as whether or not he wants to enroll in ROTC, gives the fresh-

man an opportunity to be more certain of his plans before actual registration. A significantly lower number of change orders among those who have had pre-college counseling bears this out.

Just as important are the friendships established during the summer meetings and the brief experience in campus life. When they return as freshmen in September, they already know some of their classmates and they are somewhat familiar with the dormitory and the campus.

Registration itself is greatly facilitated by early preparations made in the summer.

Another interesting observation has been the decrease in letters from parents, previously brought about by misunderstandings of rules and requirements.

When the regular semester opens, each freshman is assigned to a faculty counselor who assumes the responsi-

bility of advising him all during the year. If the student has decided on the major course he will follow as a sophomore, he is assigned to a faculty member in his chosen field.

Although the counselor stresses the importance of the student making his own decisions, he can offer advice based on experience and statistics. If, for instance, the student has expressed a preference for engineering, yet seems to have talents and interests which have proved more adaptable to other fields in the past, he is advised of this situation. He is not, however, told definitely that he should not pursue engineering.

More often the student is not certain of his future vocational choice. In such cases the counselor can answer questions about different courses and help guide the student into the right field.

Additional resources may be recommended by the counselor. About 300 students each year make use of vocational counseling services conducted by the Psychology Department.

At the end of the first seven weeks of school all freshmen again meet with their counselors to receive grade reports. After 13 weeks they return to their counselors for further reports and initial planning for the second semester's schedule.

If grades are extremely low at the end of 13 weeks, parents are notified of the situation.

All of these steps are designed to help the student keep an accurate check on his academic standing so that he may have time to make adjustments if needed to meet university requirements. Problems are studied well in advance of deadlines through the counseling system.

Dormitory counseling, supervised through the offices of the dean of men and the dean of women, is coordinated with the academic counseling of the University College, so that freshmen needing study help may receive it at the dorms.

Not all freshmen become sophomores. But the thorough counseling program, which now starts even before the beginning of his first semester in college, helps assure every Ohio University freshman of the opportunity to do his best in the pursuit of higher education.

SMALL GROUP MEETING, conducted by Assistant Dean of the University College, Dr. Bernard Black, pravides information cancerning academic plans, campus rules and social life.

MEETING OTHER FRESHMEN, the twins enjoy the University Center with Jim Davis (left), Monroe, Ohio, and Dick Knight, Athens. In high school Joan and Judy were cheer leaders, majorettes, musicians (flute and piccolo), members of a papular singing graup.

BUSAGRISCIENCE

A Modern Concept of Agriculture Training

by Dr. Burton W. DeVeau

Page 8 fur Ohio Alumnus

THE DEVELOPMENT of agricul-Ture in the United States has followed the pattern of industrial development. At one time agriculture was self sufficient. Farmers produced the food they ate, the clothing they wore and sold or traded their surpluses in their local communities. They manufactured their own tools and implements and raised their own power.

During the past 150 years agriculture has changed from this state of self-sufficiency to one of dependency upon the related agriculture fields and services. Today's farmer is no different from his city neighbor in terms of where he purchases his food, clothing, tools and equipment.

In 1954 it was estimated that eight million people were employed in farming, six million in providing farm supplies, and ten million in processing and

distributing the farm output.

American farmers buy about sixteen billion dollars in supplies each year and sell about thirty billion dollars in products to processors and distributors. The processors and distributors add enough services and supplementary products to convert farm commodities into seventy-five billion dollars worth of consumer items at the retail level.

Upon examination of these few figures we can easily determine that the importance of the related agriculture business enterprises has grown so vast that the gross income of the nonfarming phases of agriculture is approximately three times greater than total gross farm income in the entire United States.

Agriculture a Misnomer

In the words of Dr. John Davis of Harvard University the word agriculture as it relates to all its fields is a misnomer. Rather, to name it appropriately, it should be called "agribusiness."

While agriculture is constantly changing technologically and in its relationship with business enterprises the needs of our society and economy are also changing. Therefore, it becomes the responsibility of educators in agriculture to thoroughly examine curriculum requirements and the content of each individual course and make revisions to meet the conditions of this changing agriculture.

This does not mean just debating the number of laboratory hours to spend identifying crops or judging meat type hogs. Rather, it means adjusting our curricula and courses in order that students in agriculture may be best trained to fit into our society and economy.

A recent study of agriculture students and graduates at Ohio University revealed that, outside of the armed forces, eighty per cent of the graduates

and non-graduates entered related or non-related agriculture business occupations.

Surveys of the job preferences of present students substantiate these findings. These findings are similar to the results obtained from studies conducted at other colleges or departments of agriculture throughout the United States. The fact that over fifty per cent of the agriculture students in most colleges and universities in the Northeast quarter of the United States have a city or non-farm background indicates this trend is one which will continue for a long time into the future.

At the present time Ohio University has four curricula in agriculture: general agriculture, soil conservation, preforestry, and teacher training. Graduates in the first three curricula receive the BSA degree and in teacher training

the B.S. in Ed. degree.

Upon completion of a recent curriculum study in the Department of Agriculture it was decided to establish a combined agriculture, business, and science curriculum. Currently, this curriculum is being called BUSAGRISCI-ENCE.

Students enrolled in the BUSAGRI-SCIENCE curriculum take a minimum of 30 hours in agriculture courses of which 23 hours are required; 30 hours of selected courses in the College of Commerce of which 18 hours are required; 27 hours in laboratory science courses of which 21 hours are required; and public speaking in addition to University College requirements.

This curriculum is designed to provide the student with a broad, basic background in the areas of agriculture,

business and science.

Persons completing the degree program are trained to take responsible positions in the various non-farming business and scientific phases of agriculture. This curriculum also provides opportunities for the student to achieve

the basic skills and training necessary for farming and for advanced study in agriculture and business.

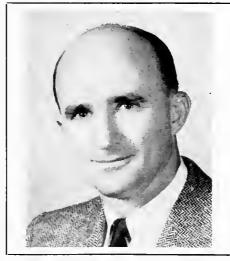

It is anticipated that this program will meet the needs of students in agriculture better than any agriculture curriculum now functioning at Ohio University. It is also anticipated that the purposes of agriculture training in a university and the expectations of industry and the general public of higher education in agriculture will be met in that the BUSAGRISCIENCE curriculum will provide sufficient agricultural knowledge for the student to make some contribution to the community in which he lives and works and to the advancement of agriculture in general.

The Agriculture Department has become so convinced in the merits of the BUSAGRISCIENCE curriculum that it is dropping its curricula in general agriculture and soil conservation. It is transferring the preforestry curriculum to the Botany Department and changing the degree program from a BSA to a BS with a major in Agricul-

The teacher training program will not change except in courses in agriculture offered. In addition to the changes in curricula each course has or is undergoing a complete change with the new curriculum objectives in mind. Many of the present courses have been deleted or combined.

Such drastic changes in agriculture curricula reflect a modern concept of higher education in agriculture and, to a certain extent, are pioneering in the field of agriculture curricula. These changes are in pace with modern agribusiness in that they meet the needs of our agricultural society and economy.

Of equal importance is the fact that in the BUSAGRISCIENCE curriculum Ohio University will be offering a program in agriculture in which the University has its greatest depth.

The Author . . .

Dr. Burton W. Del'eau, associate professor and chairman of agriculture at Ohio University, currently is serving as president of the National Association of College Teachers of Agriculture. During the past year he has consulted with faculty members and officials of many universities concerning the development of a Busagriscience curriculum, and he is one of the leaders in this new movement in agriculture training.

A Look to the Future

The campus of Ohio University continues to expand in several directions as the new semester opens, with four major buildings nearing completion and three more scheduled for ground breaking soon.

The Indoor Practice Building is progressing rapidly after an unforseen interuption in construction during the past year. Students will be skating on the ice rink, which is a major feature of the building, this semester, according to current plans.

Also expected to be opened sometime this semester, at least for partial use, is the new addition to the Engineering Building on President Street.

Jefferson Hall, largest of the East Green dormitories, is in partial use now and scheduled for completion by the

first of January.

The other major building under construction at the present time is the Helen Mauck Galbreath Memorial Chapel being erected between Ellis Hall and Memorial Auditorium.

Construction of two large classroom buildings will get underway before the end of the semester, bids having been completed this summer. An Education Building, located next to Rufus Putnam School will extend the academic campus eastward.

A Life Science Building, the first permanent OU classroom building to be constructed south of the Hocking River, will serve as the home for the Departments of Psychology, Botany, Geology, Biology and Geography. It will stand on the site of the temporary engineering buildings.

Soon afterwards, probably in the early part of 1958, ground will be broken for a new Physical Education Building, according to present plans. Located on the present site of the baseball diamond, it will be between the Indoor Practice Building and Richland Avenue.

Summer Commencement

Don E. Weaver, editor of the Columbus Citizen, addressed 179 graduating students and their guests at the summer Commencement August 10. Speaking on the topic, "The Personal Cosmos", Mr. Weaver described the problem of today's citizen in fitting himself happily and usefully into a changing society.

"Few of us can change the universal cosmos very much, but the personal cosmos is our own," the Columbus journalist said.

Bachelors degrees were presented to 123 men and women and masters degrees to 56. Divided according to colleges they were: Education, 58; Commerce, 23; Fine Arts, 6; Arts and Sciences, 6: Applied Science, 4.

Ohio University alumni who received advanced degrees were:

Master of Education—James Joseph Armbruster, '56; Oville C. Bibbee, '41; Angelo A. Candela, '38; Clarence Rae Dicken, '50; Laroma Dee Gaver, '49: Leonard G. Gutkowski, '52; Tildon John Hike, '50; Virginia Alba Huff, '50; Raymond Wilbur Hurd, '51: Clarence C. Ives, '40; John Hollis Lanman, '56; Richard Thomas Mc-Carty, '49; Reba Pinney, '52; Edith

AUGUST COMMENCEMENT PROCESSIONAL across the College Green is led by President John C. Baker and Don E. Weaver, editor of the Columbus Citizen. Mr. Weaver delivered the Commencement address to 179 graduating seniors.

Jane Porter, '46; Joseph Norman Ross, '56; Jack Spencer Sampselle, '56; Robin D. Smith, Jr., '53; Herbert Thomas Somerville, '51; Albert R. Squibb, '51; Harold J. Thorley, '50; James N. Webster, Jr., '56; Elizabeth Ann Yost, '55.

Master of Arts—Frederick Gerard Attanasio, '56; William R. Barlow, '54;

James R. Justice, '52.

Master of Fine Arts-John Davin Pierson, '56.

Master of Science-Carl William Phillips, '56.

Technical Institute Opened

A Technical Institute curriculum has been established by the university, to operate in connection with the OU Branch at Zanesville.

Designed specifically for adults interested in training as engineering technicians, the new two year course comes as the result of a thorough study. In addition to a scries of meetings with leaders of industry, Dean of the Branches A. C. Gubitz visited technical institute programs in Massachusetts, New York, Pennslvania and Indiana.

These meetings revealed a definite nced for more trained technicians in

The technical program is designed to teach fundamentals of engineering, mathematics, chemistry and physics, and will be "tailored" to meet needs of Zanesville industry, according to Dean Gubitz.

Students Win Prizes

Judith Ellen Staab of Avon, Ohio, is the first recipient of the Borden Freshman Prize.

The eash award of \$200 is given by the Borden Company Foundation, Inc., to the Ohio University student who completes the freshman year with the highest point-hour-ratio in the class. Miss Staab's average was 3.939.

Established last March for the purpose of "emphasizing the importance of scholarly work at the very beginning of the student's college career," the prize will be presented for the next five

In addition to receiving the cash prize, Miss Staab will have her name displayed on a bronze plaque in the University Center.

During her first year at the university she was active in Women's League, Wesley Choir, the University Band, Alpha Lambda Delta and the dormitory standards committee.

Why Workshops?

Business, industrial, professional, educational and government organizations are backing summer workshops in ever increasing numbers on the nation's campuses, and with good reason.

THIS SUMMER more than 100,000 adults attended workshops on American campuses. An even larger number of high school students took part in similar programs.

What are the reasons for this interest in workshop training? And why has it been growing rapidly on nearly every major campus in the

country?

The answers to these questions can be found in the direction of present day thinking. Not only is there a need for more expansive backgrounds of education in coping with proposals for the future, but there is also a growing demand for realignment of established ideas

and policies.

The science teacher who graduated 20 years ago finds that he needs a fresh look at his field if he is to prepare his students for the world of tomorrow. The young business executive finds that he can gain an important advantage from a concentrated look at the combined experiences of successful men. In many instances a man suddenly finds himself in need of learning an additional skill to keep pace with the demands of his position.

Added to these is the availability of the campus in the summer months, with facilities

for training and housing.

The resulting development of summer workshop programs is not only logical but imperative in supplying the demand for concentrated learning. Whether it is sponsored by the university or by a separate organization utilizing university facilities and manpower, the summer workshop has gained favor in widespread areas.

SCIENCE TEACHERS INSTITUTE, financed by the National Science Foundation, drew high school chemistry, physics and general science teachers from 12 states to the OU session. Unlike most other special summer programs, the Institute provided full six weeks term with academic credit, paid participonts \$75 per week plus allowances for travel and dependents. In the photo, Somerset, Pennsylvania, chemistry teacher, George Pfrogner, right, gets assistonce from University of Utah prolessor, Dr. Lloyd Malm, in assemblying a molecular model. Institute was directed by Dr. Lawrence P. Eblin, chairman of the Ohio University Department of Chemistry.

SUMMER BROUGHT 18 ADULT WORKSHOPS TO OU

BUSINESSMEN from 12 states attended the third annual Executive Development Program, designed to supplement company training programs. Relaxing between sessions are (1 to r) Harold Keller, Conrad Page, John Pearson, Thomas Costello and Charles Flaskamp.

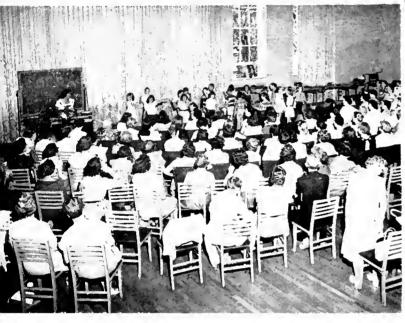

CONFERENCE FOR TEACHERS of high school English stressed round-table discussion method of exchanging information on theories and practices relating to the teaching of English. The conference was directed by Associate Professor Edward Stone.

OHIO WORKSHOP ON ECONOMIC EDUCATION featured discussions by top representatives of labor, industry, agriculture and business, like Samuel M. Cohn, U. S. budget analyst, who presented chart talk on income and expenditures.

SPECIAL PAINTING CLASSES, with instruction by prominent artists, lasted two weeks. The classes were offered either as a separate workshop or as a part of the summer school curriculum. Another summer feature was the Ohio Valley Oil and Water Color Show.

CONFERENCE IN ELEMENTARY EDUCATION brought tagether clossroom teochers, principals and supervisors for talks and demanstrations by university faculty and guest speakers. Workshops also were given in kindergarten teaching and school administration.

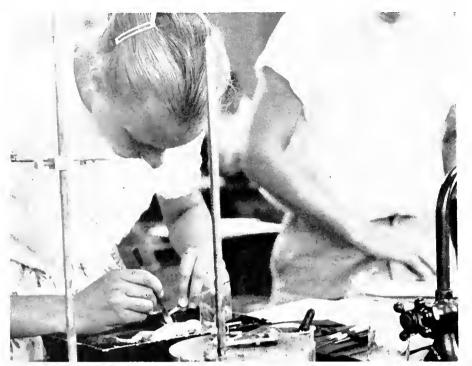

OHIO VALLEY SUMMER THEATRE combined efforts of the university and community of Athens in presentation of six plays.

Scene is from William Inge's "Bus Stop".

October, 1957

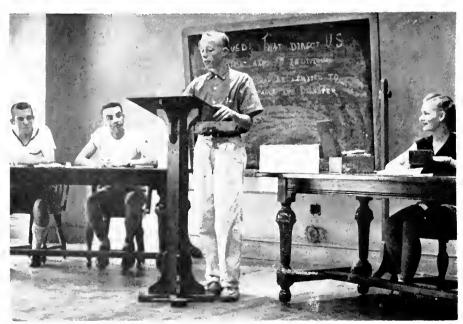

STUDENT WORKSHOPS COMBINED LEARNING, RECREATION

SCIENCE WORKSHOP for high school students included both lectures and laboratory work for outstanding science students selected on basis of recommendations from schools.

THERE ARE two basic purposes behind summer workshops for high school students. The first is to provide a sample of university living and teaching methods to help in decisions concerning the pursuit of higher education. Second is the stimulation of interest in certain high school areas together with the presentation of ideas which can make high school experiences more beneficial. All five Ohio University workshops for high school students serve both purposes.

Carrying out a successful high school workshop requires the cooperation of several campus groups. Plans must be made far in advance so that selections and reservations can be completed in time. Arrangements for dormitory counseling, recreation programs and meals are added to those of securing adequate instruction and classroom space. The successful summer workshop thus becomes a year-around responsibility.

WORKSHOP IN DEBATE emphasized onolysis of debate propositions, evaluation of evidence, construction of the brief and formal debate practice for high school students.

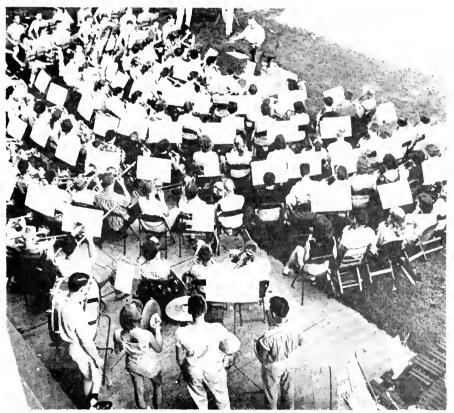

STUDENT COUNCIL WORKSHOP, first of its kind in the state, had model councils

PUBLICATIONS WORKSHOP, largest of its kind in the country, offered something new, television news production, ot its 12th onnual session. Workshop attracted 1245 high school students and teachers from 294 schools in 10 states.

discussions and group meetings to help students plan similar programs in high schools.

MUSIC CLINIC was conducted for students interested in band, charus and orchestra. Later in the summer an Elementary Teachers Music Workshop was attended by 200 teachers

FOR SOME time we have been hearing complaints of the poor quality of written work done by college students or even graduates. According to Dean William C. Warren of the Columbia University School of Law, the inability of college graduates to handle the English language has reached "epidemic proportions." In trying to teach them to write, he has said, "we confess to a sense of frustration." (1) Dartmouth College, "not satisfied with American higher education as it is and earnestly concerned with improving it, particularly "wants a higher

A noted teacher-writer examines
a problem which has long been of concern
to universities and university graduates.

Handling the English Language

by Louis Foley, '15

proficiency in written English" and plans "to give it special emphasis." (2)

In the fall of 1955 at Ohio State University, on the basis of placement tests in English administered to entering freshmen, only 428 showed proficiency, 3,790 had to start in a lower course than the standard, and 894 went into "remedial English." Moreover, of these 894 none gained a mark of "A," and 344 or 44.85% flunked the remedial course! In this connection it has been noted that "roughly 90% of those who flunk remedial English flunk all the way out eventually." (3) It appears that at the University of California one-half of the applicants regularly flunk the English entrance examination. (4)

There have been those who have blamed the poor preparation of American students on too much "spoonfeeding." But spoon-feeding is something we all have to go through, and it is a distinct advance over the nursing-bottle. After all, it *could* he that the "formula" has not been quite right, or that the feeders have not used the proper kind of spoon.

Learning to write clearly, correctly, and effectively is a rigorous discipline. It requires continual, frequent exercise, whether a person "feels like it" or not. Proficiency in it is not to be acquired as a carry-over from learning rules or reading good literature or filling

blanks in work-books.

First of all, however, there must be genuine motivation. In what conditions does a student naturally do the best writing he knows how to do? Common sense should give us the answer: when he has occasion to deal with matters of his personal knowledge and experience that he really cares about and wants to make understandable, and when he knows that what he writes will be attentively read by someone who is "particular" about its being presented in good form.

Teaching people to write takes a good deal of time and effort. It requires reading a great many papers. Yet these do not need to be long, and they can often turn out to be truly interesting reading. Any teacher of English who does not, for the most part, really *enjoy* perusing his students' compositions should in all honesty renounce his profession and turn to something else.

Sometimes in the larger universities the classes in "freshman rhetoric" have been entrusted to graduate assistants or inexperienced instructors who were considered mere apprentices on their way up. No doubt most of them have tried to do an honest job, but they could hardly be expected to have their heart in it. They could not be blamed for being more concerned with their own graduate studies, looking forward to the day of release when they could devote themselves to erudite lectures on literary movements or to guiding brilliant advanced students in research

projects. Then they would begin to be respected as really getting somewhere. They would be henceforth free from servitude to the dull inculcation of a mere "tool subject."

Not a Subject

Writing is not a "subject;" it does not exist in the abstract. It is a *skill*, and as such can be developed only by regular, sustained practice over a considerable period of time. It is no more likely to be learned otherwise than is proficiency in swimming or football or billiards or playing the piano. The kind of teaching it calls for is not so much that of a traditional "professor" as that of a *coach*.

Now how does a coach operate? He gives directions beforehand, he is present to give helpful suggestions during the practice, and he makes detailed criticisms afterward, so that characteristic mistakes can be avoided next time. Right at the moment when you are interested in knowing, he is there to tell you not only what is wrong but why, and to show you how another way of doing works better. While some general directions may apply to a whole group, each individual requires certain special explanations or warnings which others may not need at all or not in the same way.

And no less in writing than in athletics, the important part of an instructor's contribution is the help he gives the individual in solving his own special problems, overcoming his particu-

lar handicaps, making the most of his

potential ability.

Countless times during a period of many years, I have seen it convincingly demonstrated that there is not necessarily any significant correlation whatever between a student's score on a vocabulary test (prepared in advance as much as you like) and his ability in writing.

On the one hand, there are students who can safely be depended upon at any time to produce a paragraph in perfectly correct English, saying clearly and forcefully what they meant it to say, and who will nevertheless fall surprisingly low in a test of word-knowledge.

On the other hand, there are students who will score very well in a test on vocabulary—much higher than the average—and yet seem quite incapable of writing at a given moment a single sentence of construction worthy of a mature mind.

It seems almost like a coincidence when a student shows up equally well in *both* these kinds of examination. Such, of course, is the ideal, and sometimes it happens. The different ways or aspects of "knowing English" *can* fortify each other, but the process is very far from being automatic.

The Real Language

Grammar is quite another matter. While vocabulary may come and go, grammar is the real language, the system by which we produce coherent expression.

The "rules" of grammar have aroused some people's antagonism. Unfortunately they have sometimes been awkwardly stated from an arbitrary point of view, so that they seemed pedantic when in fact they were not. They represent attempts to describe scientifically the way parts fit together to form an organic pattern.

To start from the "rules," however, may be for most people the wrong approach. What is basically important is to have the *feeling* for "the way the thing works"; later this may be clarified and confirmed by recognizing the

truth of a general statement.

Memorizing the rules first is not a very effective procedure. It reminds me of the way some people go about punctuation. A number of times I have seen a person write correctly word for word a rule concerning the use of commas—and violate the rule in the very statement of it!

The well-known semanticist, S. I. Hayakawa, has said: "Grammar should be administered like drugs—only when the patient is ailing, and only to the extent needed....It should be offered sparingly, on demand when

The Author . . .

The byline of Louis Foley. 15, is well known to readers of The Ohio Alumnus magazine. A member of the faculty of the Babson Institute, Mr. Foley is a regular contributor to several national magazines, including the Alumnus. He also is the author of three books and a consultant in the study of languages. In this article Mr. Foley presents a frank analysis of a perplexing problem of the day.

the student himself feels the need of some guiding principles."

The giving of "objective" tests (which can be graded mechanically), however legitimate in its proper place, should not be confused with *teaching*. Neither should the business of being a taskmaster.

The traditional manner of making a composition assignment: "Hand in next Tuesday an essay of a thousand words on "gives the performance about as bad a start as can be imagined. The mere length of a composition is comparatively unimportant and will fairly well take care of itself. Anyone who can be relied upon to write one or two thoroughly good paragraphs will be quite able to turn out fifty or a hundred when the job requires them. Until he can write a good short composition, trying to do longer ones will merely sink him a little deeper in the ruts of his bad habits. Also, to get the prescribed length, if it does not come naturally, he will be tempted to use "filler" to satisfy the requirement. In any case, the longer piece of writing cannot be read so carefully by the instructor, or its virtues and faults so easily shown.

Writing Under Pressure

The best form of exercise is writing in class, "under pressure," with full liberty to ask questions or to call upon the instructor for assistance with any little problem that appears. The purpose is not to let the student make mistakes and then catch him up on them, but to give him whatever help he needs to get the experience and satisfaction of carrying through to an acceptable result. Most of us need aid and encouragement more than we need criticism.

We are all naturally prone to pay

little or no attention to how any particular kind of work is actually done until the time comes when we really wish to be able to do it ourselves for purposes of our very own. Then suddenly we become curious as to how other people have gone about similar tasks, how they handled problems which, because we commonly met them already solved, we did not realize to have existed.

This is why the simple fact of doing a great deal of reading does not of itself make a person a good *writer*. There are plenty of people who read the best books with understanding and enjoyment but who could not turn out a first-class paragraph if their life depended upon it.

A Paradox

It is rather amusing to contemplate the solemn doctoral theses painfully devoted to the work of distinguished writers who themselves never came within a mile of any academic degree. Yet they learned to write more effectively than some of the people who write so knowingly about them. They learned simply by working at it. They could have learned better and avoided many of their faults if at suitable times. before they had settled into unfortunate mannerisms, they could have had a little guidance from someone who might have lacked the peculiar interest or inspiration that happened to make them "tick," but who could have shown them some practical points of technique that never occurred to them.

Many successful writers had to learn "the hard way." The easy way of doing anything—so long as it really does it—is always the best. The function of a teacher is to help students find the

easy way.

Dr. Volwiler Dies

Dr. A. T. Volwiler, chairman of the Department of History for eight years, died June 25 after an illness of one month.

A member of the Ohio University faculty since 1933, he had been a full professor of history since 1934 and chairman of the department from 1947 to 1955.

Dr. Volwiler received his bachelor's degree from Miami University in 1910 and his master's degree from the University of Chicago the following year. He was awarded the degree of doctor of philosophy from the University of Pennsylvania in 1922.

Before coming to Ohio University he served as professor and chairman of the Department of History at Wittenberg College.

A well known figure in his profession, Dr. Volwiler was a member of the Society of Colonial History, Society of American Historians and the American and Mississippi Valley History Associations. He also was a fellow of the British Royal History Society, a trustee of the Cooper Ohioana Library and a consultant to the President Hayes Memorial Library.

He had been president of the Ohio Academy of History and a member of the Ohio War History Commission.

Dr. Volwiler served as chairman of the University's Ohio History Committee for three years while it established the annual Awards Competition in Ohio History, Government, and Citizenship for high school students. A strong backer of the program, which has become an important event of the school year, he continued to serve on the committee after retiring as chairman.

Dr. Volwiler was author of several books and historical articles.

Dr. Volwiler

Administrative Changes

Five administrative changes become effective with the opening of the new school semester.

Lt. Col. Caleb P. Moberly, former base comptroller of Evreux-Fauville Air Base near Paris, France, has been appointed professor of air science, heading the university's AFROTC program. He succeeds Col. Leon H. Berger, who has been assigned to the Air War College at Montgomery, Alabama. Colonel Berger has been at Ohio University for the past three years.

Colonel Moberly, a pilot, has flown more than 3500 hours during his 15 years in the Air Force, He participated in the invasion of southern France and the ferrying of supplies to Tito's underground Partisian Army during World War 11.

Both Colonel Moberly and his wife are graduates of Miami University. Oxford, and he holds the master's degree in industrial management from the University of Pittsburgh.

In other administrative changes Joseph H. Dando, former assistant dean of men. becomes director of men's dormitories; and Edward A. Sudnick, advances from director of student financial aids to assistant to the director of admissions and university examiner.

A graduate of Wellston High School, Mr. Dando attended Ohio University and Ohio State University before receiving his degree from Arizona University. He has done graduate work at OU.

Mr. Sudnick, a 1950 Ohio University graduate, received the master's degree in 1955. He has served as president of the student financial aids section of the Ohio College Association.

Named to succeed Mr. Sudnick as director of student financial aids is Myron A. Hutcheson, a June graduate of the university. A graduate of Linden McKinley High School in Columbus, he served two years in the Army as a public information specialist.

Robert E. Matson, '53, is the new assistant dean of men, filling the position vacated by Mr. Dando. A native of Chauncey, Mr. Matson served two years in the Army as a battallion staff officer after graduating from OU. In 1955 he returned to the campus, serving as head of residence in a men's dormitory and receiving the M. S. degree in education this June.

OU Faculty Increases

Ohio University's faculty swelled to a record 423 with the addition of 64 members at the beginning of the current semester. Twenty-eight of the faculty members fill new positions created by increased enrollment and the others hold positions vacated through deaths, retirements, and resignations.

Included in the group are two full professors, four associate professors, 14 assistant professors, 32 instructors, four acting instructors, two part-time instructors, one assistant reference librarian, four lecturers and a visiting professor.

Four faculty members, Prof. Paul M. Kendall, Associate Prof. Frederick H. McKelvey, Assistant Prof. John T. McQuate, and Instructor Gertrude Szaroleta, are on leave of absence.

President Leaves ECOSOC

Resignation of Ohio University President John C. Baker from the post of U.S. representative to the United Nations Economic and Social Council was formally accepted this summer in a letter of regret from President Eisenhower.

The acceptance followed a letter to the White House in which Dr. Baker submitted his resignation from the ECOSOC post, citing "accumulated university responsibilities" and his appointment as chairman of Ohio's Commission on Education Beyond the High School as reasons for his action.

President Eisenhower's reply, expressing regret at Dr. Baker's resigna-

tion, said, "I fully understand the reason for your decision."

It praised Dr. Baker's work with ECOSOC, stating that "you have met with distinction and ability the many and difficult problems arising in the council—the only international forum wherein economic and social issues are discussed on a nation-to-nation basis—and where you upheld the principles upon which this great organization was founded."

President Baker, first named to ECOSOC in 1953, resigned during the sesquicentennial year at Ohio University, but returned to the post in 1955 as permanent U. S. representative. ECOSOC affairs too! him to Geneva, Switzerland, three times and to New York City many time. In 1955 and 1956 he also served as enior advisor to the United States delegation to the United Nations General Assembly.

Summer Schedule Revised

Two five-week terms instead of one eight-week session will comprise the 1958 summer session at Ohio University.

Approved initially for two years, the

terms will run from June 16 to July 18 and July 21 to August 22. According to Dr. Gilford Crowell, summer session director, the new arrangement will provide students with greater opportunity to utilize the university on a year-around basis. In contrast to the eight weeks average load of nine credit hours, a student will be able to carry a normal five weeks load of six hours.

This is expected to be particularly beneficial to students desiring to complete the undergraduate program in less than four years and to graduate students who will be able to complete work for a master's degree in three summers instead of four.

Advantages also will be gained, according to Dr. Crowell, for college students needing remedial work and for incoming freshmen who are deficient in certain high school subjects.

The new program is in keeping with widespread university attempts to utilize facilities to a greater extent, prompted by the anticipated increases in enrollments.

The three-week post session, which limits a student to three credit hours of study, will be abandoned.

Now & Then

ON THE STEPS
OF ELLIS HALL

A PROJECT carried out by photography students is providing a documentary of changing scenes and fashions at Ohio University. The students match old photographs with similar scenes taken today, producing interesting comparisons such as the one shown here. Others will be presented in future issues of the magazine.

Bobcat Roundup

By Rowland Congdon, '49

ANTICIPATION of a reversal of 1956 form by the 1957 Bobcat football aggregation is high along the banks of the Hocking River.

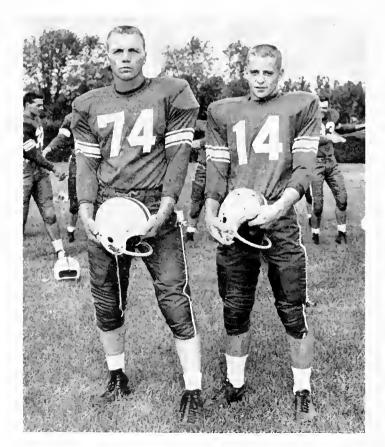

As this was being written just after the first week of fall practice had concluded, 49 candidates of an original list of 58 were still "bumping heads" in an effort to be a part of Head Coach Carroll Widdoes' ninth Ohio U, team.

Scrimmage sessions are the determining factor in most cases of separating the men from the boys. Two of these were held the first week and it soon became evident that the Bobcats were going to be faster and heavier and have more depth than for several years.

At weighing-in time just after squad members reported Sept. 1, weights ranged from the 155 pounds of Junior Halfback Gary Sargent of Fredericktown to the 285 pounds exhibited by Tom "Tiny" Graf, sophomore tackle from Lancaster, Graf stands 6-6, Sargent is 5-9.

With Co-Captains Jim Hilles of Warren and Ron Fenik of Elyria leading the way, 19 lettermen reported. Of these, 10 were in the backfield, and added to some top freshman

Co-Captains Fenik, Left, and Hilles

talent there, the Bobcats appeared three deep in all positions.

Three lettermen—Charles Stobart of Middleport, Ron Macuga of Masury and Gabriel Desantis of Akron—were at quarterback. Three more were at fullback, following the switch of Dave Kuenzli of Upper Sandusky from halfback. The other two are Larry Buckles of Logan and Vern Smith of Eaton Rapids, Mich.

And four halfbacks are letter winners. These are Hilles, Les Carney of Wintersville, Tom Redman of Waverly and

Norm Leggett of New Philadelphia.

Unfortunately, Leggett reinjured the knee which required an operation last spring and his status for the season at this time was doubtful.

Carney, Macuga and Smith are veterans returning from other seasons along with End Jack Vair of Warren. Carney was a halfback on the Mid-American Conference championship team of 1953 while the others played in 1955 but not last year.

Top sophomores in the backfield so far have been Frank Dunigan of Lakewood, a speedster who sometimes beats the fleet Carney in wind-sprints: Randy Bailey of Columbiana; and Tim Bhrendt of Ashtabula, a transfer from Denison University. All are halfbacks.

Two other ends besides Vair are lettermen. These are Paul Gallagher of Zanesville and Jim Smith of Northfield, both juniors. Top sophomore prospects here are Bill Gilbert, former Cincinnati Western Hills athlete, now living in Baltimore, Md., and Bob Wisniewski of Lima, a converted quarterback.

At tackles, besides Fenik, the only other letterman available is John Yates of Logan. Jim Woods of Athens just missed lettering last season after an early illness. Jerry Kreiger of Massillon and Joe Trevis of Lowellville join Graf as top newcomers at tackle.

Guard lettermen are Doug Strang of Eaton Rapids, Mich., and Dave Stricklin of Struthers. A top prospect for starting at this position is Ken Fisher, Massillon sophomore. Other sophomores here are Ron St. Pierre of Dayton, Ralph Leard of Warren and Dean Jennings of Bay Village, the latter two switched from tackle.

At center, Lettermen Myron Lepore of Youngstown and Terry Mallett of Toledo hold forth ahead of challenges from sophomores Dick Greeni of Akron and John Bladowski of Irvington, N. J.

Games with Indiana State Teachers College (Indiana, Pa.) and Toledo will have been completed by the time this column rolls off the presses. Remaining on the 1957 schedule are:

October 5-Kent State At Athens

October 12—At Harvard

October 19—At Miami

October 26—At Marshall

November 2—Western Michigan (Homecoming) At Athens

November 9—Bowling Green at Athens

November 16—At Louisville

OCTOBER, 1957
Page 21

#—Birthdate of player listed if age changes during season.

*-denotes number of letters won.

Among the Alumni

1898

Dr. J. T. Ullom's wife died July 7 at their home in Philadelphia.

1913

JOHN O. GRIMES, formerly a dean at Arizona State Teachers College, is now a professor emeritus of that school.

1915

MAG S. BETHEL'S wife, well known in Cleveland for many years as a soprano soloist, died in August at their home in Lakewood.

1921

DR. GEORGE A. WOOOHOUSE, Pleasant Hill, Ohio, physician, was chosen president-clect of the Ohio State Medical Association at a recent meeting of the group's house of delegates. He will be installed as president at the 1958 annual meeting in Cincinnati. Dr. Woodhouse has long been active in the state organization, which has a membership of 8500 medical doctors. In addition, he is one of five members of the Judicial Council of the American Medical Association and a member of the Ohio delegation to the AMA House of Delegates. Engaged in general practice of medicine at Pleasant Hill for 32 years, Dr. Woodhouse also is a staff member of hospitals in Piqua and Troy.

Dr. Sumner Price, medical director and administrator of the Queens Hospital, Hawaii, spent six weeks this summer in Japan. His wife and children accompanied him on the tour which included visits to Tokyo, Nikko, Kyoto, Nara and other points of interest.

1927

ALVA BIRDSELL DICKEY, formerly with The Case and West Agency, Inc., Columbus, is teaching school at Delaware, Ohio. Gerard C. Powell visited the United States this summer on furlough from Sao Paulo, Brazil, where he is financial director for Goodyear of Brazil. Mr. Powell and his wife, the former Eleanor Wernet, have lived in South America for 27 years. Joining Goodyear in 1928, he went to Argentina after an 18-months training period at Akron. In 1952 he was transferred to Lima, Peru, and three years later he joined the plant in Sao Paulo. Mr. and Mrs. Powell have two sons, one a student at the Harvard Graduate School of Business Administration and the other a senior at William and Mary College.

1928

J. Allen Chase, former resident of Huntington, West Virginia, has moved to Houston, Texas, where he is supervising auditor for the Federal Power Commission.

1930

CLARA POSTON. professor of education and director of secondary teacher training at Rio Grande College, served on the staff of the Ohio University summer workshop in education.

MARGARET TOMPKINS BURES (Mrs. Paul L.) received the M. A. degree from Adelphi College, Garden City, N. Y., in June.

1931

Monica Ucker Stedem (Mrs. Joseph) is teaching commercial subjects at Murray City High School this year. Last year she taught at Nelsonville.

Iris Young Vaden's husband, James Vaden, died June 22 at Menlo Park, California.

Bertha Kulberg Almas (Mrs. A. L.) and her husband have moved from Lynn, Massachusetts to Seattle, Washington, Mrs.

Almas is teaching in the Washington Junior High School there.

MARY LOUISE RICHARD teaches English at Massillon High School.

1932

John R. Trace, principal of Washington Court House High School for the past three years, resigned this summer to become director of education for Guam, island territory of the United States. Mr. Trace, who held a similar position on the island of Samoa from 1949 to 1952, received the appointment from R. B. Lowe, governor of Guam, with whom he became acquainted while he was in the Navy during World War II. Mr. and Mrs. Trace and their two sons left for the island in July.

HELEN M. DEACON is employed in the circulation department of Life Magazine.

DALE E. WILLIAMS and his wife, the former Virginia Bailey, Hubbard, Ohio, have a daughter, Carole, entering Ohio University this semester.

1933

IRENE CHILTON MOATS (Mrs. Harry H.) retired this year after teaching for 52 years. Starting as a substitute teacher in 1905, she taught in high schools, then Wilberforce University, Bluefield State College, and, most recently, Florida A and M University, where she was an associate professor of English.

ELEANOR P. MORROW, formerly of Lakewood, is teaching at Howland High School, Trumbull County, Ohio.

1934

JOSEPH B. OGDEN recently was appointed general manager of the Air Conditioning Division of the Whirlpool Corporation, St. Joseph, Michigan.

E. C. McChesney has moved from Lima to Columbus where he is sales superintendent for Western Ohio and Indiana with the Nationwide Insurance Company.

1935

HAROLD L. LEE, a teacher at Athens High School since 1942, has been named acting principal. Mr. and Mrs. Lee have three children, Don, who graduated from Ohio University in June. Linda and Pattie.

Dr. George F. Jones is an X-Ray specialist at the Lancaster-Fairfield Hospital, Lancaster, Ohio.

Samuel G. McEldowney is a special agent for the Federal Bureau of Investigation, working out of the San Francisco office.

1936

EMERSON ROUSH, a teacher for the past 15 years in Pickaway and Fairfield County schools, has been appointed supervisor of instrumental and vocal music for Starr-Washington schools near Logan.

Charles D. Ferraro was awarded the doctor of philosophy in education degree from Western Reserve University in June.

MEMBERS OF THE CLASS OF 1912 who ottended the June reunion at Ohio University were unintentionally slighted when their photo did not appear in the June magazine along with those of other reunion classes. The group included: First row, left to right, Kothryn Roeser Dunlap, Mayme Lash Cable, C. M. Ella Buch and Nellie E. Wolters Wheaton. Second row, Harry Ridenour, Fred Wheaton, Mrs. Frank Palmer and Hazel Rigby Mast. Third row, C. F. Sharp. Will R. Coble, H. L. Dunlap and C. R. Ridenour.

SAMUEL DILLON, former superintendent of schools at Glouster, has accepted a five year contract as superintendent of the Monroe County (Ohio) schools.

MARY J. DAVIS received the M. A. degree in home economics-education from Marshall College in August.

1937

E. C. "Pete" Shingleton is manager of industrial and farm tire sales for the B. F. Goodrich Company, Akron, Mr. and Mrs. Shingleton and their two daughters live in Cuyahoga Falls.

DR. EDWARD N. WISE, associate professor of chemistry at the University of Arizona, is carrying out a research project on the study of the chemistry of rare-earth elements, under terms of an Atomic Energy Commission grant of \$7,000. The project calls for fundamental research and is not in itself designed to be applied to any specific industrial problem. A former high school teacher and industrial chemist, Dr. Wise received his doctorate from the University of Kansas in 1952. Mrs. Wise is the former Ruth Clarke, '36.

1938

REUBEN J. ROTHERMEL is a retailer of contemporary furniture in San Antonio. Texas.

CLAYTON SMITH and his wife, the former Lena M. Kronk, '40, spent the summer at the University of Colorado. Mr. Smith, a teacher at Athens High School, did additional work in the field of education and guidance. Mrs. Smith, an elementary teacher in Athens, completed work for her master's degree.

EDGAR GARVIN is a junior high teacher and freshman basketball coach at Wooster.

MILDRED HAWLEY, a teacher for more than 30 years, is principal of a new elementary school in Middleport, Ohio.

1939

WADE E. SHURTLEFF, director of industrial relations at Standard Products Company, Cleveland, for five years, has joined Thew Shovel Company of Lorain in the same capacity.

GWEN M. STEINER received the degree of master of arts in education at the June Commencement of Western Reserve University.

DR. GLENN H. BROWN, University of Cincinnati chemistry professor, has completed work, in collaboration with educators from 29 colleges and universities in the nation, on a recently published American Chemical Society examination in quantitative analysis. The new test will be used in over 800 colleges in the U. S. and foreign countries. Dr. Brown served on the quantitative analysis sub-committee of the examinations committee, division of chemical education, American Chemical Society.

1941

George C. Hodoson is Chicago District nanager of advertising sales for the National Petroleum News, a McGraw-Hill publication.

Donald F. Potter, former assistant United States attorney, has been admitted to membership in the law firm of Block, Smith, Antell & Harris, Rochester, New York.

Combined Careers

LEWIS E. BUELL

FORTY THREE years of college lie between the day Lewis E. Buell of Manchester entered Ohio University in 1913 and the day he received his Masters of Education degree in August of 1956.

But the intervening years have seen the teacher, who is also a minister, attending two other universities, establishing a reputation in Methodist history-research and acting as principal of three schools.

Two years after he entered OU, Mr. Buell left for a teaching job at Millersburg followed by two years in the army during World War I. Upon his discharge as a sargeant, he became principal at the South Elementary School in his hometown Lancaster. When he took the job he still hadn't completed work for his bachelors degree which he received in 1923.

Mr. Buell went to Nelsonville as principal of the Jr.-Sr. High School in 1928 and to Wooster in 1932. In recognition of a four-year period of ministerial work on the Bartlett Methodist Circuit in Washington County during World War II, the Ohio Methodist Conference sent him to Garrett Seminary at Northwestern University in Evanstown.

While at Bartlett, Mr. Buell became "deeply interested" in religious survey and research. Under the guidance of Dr. E. A. Taylor of the OU department of sociology, he unearthed the story of the early Methodist itinerant circuit riders of the Ohio Valley, In 1949, Mr. Buell organized the 150th celebration of the introduction of Methodism into southeastern Ohio. He coined the name, "Double Diamond Jubilee" for the sesquicentennial celebration. He gave several weekly speeches on pioneer days over WRFD radio station.

In recognition of his achievement in research of the history of Methodism in the Northwest Territory, Mr. Buell was cited by numerous historical societies and accorded a place in "Who's Who in Methodism."

Deaths

Mrs. Wilson H. McKee (Constance Grosvenor, '86), member of a pioneer Athens County family, died June 13 in Sheltering Arms Hospital, Athens. She had been in ill health for six years, since suffering a hip fracture in a fall at her home. Daughter of the late Gen. Charles H. Grosvenor, she was one of the first women to attend Ohio University and later served as secretary to her father, who represented the Southeastern Ohio district in Congress. Her husband, who died in 1935, owned and operated the McKee Drug Store on Court Street for many years and was a member of the Ohio University Board of Trustees. Mrs. McKee is survived by her son, Grosvenor S. McKee, '16, Meadville, Pa.; two daughters, Mrs, Granville H. Evans (Grace McKee, '19), Belmont, Mass.; and Mrs. Edwin A. Jones (Katharine McKee, '27), Jackson, Ohio; seven grandchildren and ten great-grandchildren.

Dr. Kenneth H. Nye, a Kansas City osteopath, died June 12 at Hennessee, Oklahoma, following a heart attack. He is survived by his parents and three children.

Mrs. Roger Lupton (Fannie Carnahau, '15) second grade teacher at the Central School, Martins Ferry, for the past 23 years, died July 14 after an illness of nearly a year. Her husband preceded her in death in 1932. Surviving are a daughter, a son, and a grandson.

RICHARD N. BANKS, 57, who graduated in June with a degree in electrical engineering, was killed July 11 on the way from his home in Parma to Columbus, where he was to take the state examination for an engineer's license. Mr. Banks, who had been employed by the Bailey Meter Company in Cleveland, died at a Wooster Hospital after his car had skidded on a slippery curve. crashed through a guard rail, and rolled down a bank. He is survived by his parents and one brother.

MICHAEL EDWARD COONEY, '30, former teacher and coach, died last winter at his home in Portsmouth, Ohio. He had been in poor health for 10 years. Survivors include Mrs. Cooney, a daughter, a sister and two brothers.

Helex E. Boyles, '19, a missionary in Korea for 25 years, died June 30 at her home in North Lewisburg. Ohio. She had served in Korea from 1925 until the outbreak of hostilities in 1950, when she was flown to Tokyo to act as an interpreter and to aid in military hospitals. She returned to the U. S. when she became ill.

HOWARD BLANE JOHNSON, '09, died July 2 at Berwyn, Illinois, following a cerebral hemorrhage. A professional engineer, he had his own business for the past 20 years, with offices in Chicago, and was active until a week before his death. Surviving are his wife, a daughter and two grandchildren.

Mrs. Carlos D. Sams (Leda Terwilliger, '16), former teacher and successful poet, died July 23 in Athens, A frequent contributor to poetry columns, she won first prize in the Emerson Poetry Contest for OU graduates. Mrs. Sams is survived by her husband, three sons, five daughters, and 22 grandchildren.

Dr. Kinsey O. English, '23, died August 5 in a Chicago hospital, following a heart attack. Dr. English had practiced medicine in Chicago since his graduation from Rush Medical School there. He is survived by his wife, the former Marzuela Richards, '19, and their son, Kinsey, an Ohio University sophomore.

JOHN S. BECKETT, '07, former technical director of Sterilometer Laboratory, Inc. and Aseptic Thermo Indicator Company, died recently at Los Angeles. Mr. Beckett was author of an authoritative book on sterilization and disinfection.

DONALD S. BERRETT, '30, assistant professor of German at Indiana University, died August 22 of a heart attack at Bryson City, North Carolina. He, his wife and their young son were on a vacation camping trip through the South. Mr. Berrett also is survived by another son.

Mrs. Leo Schaeffler (Marguerite Grove Taylor, 17) died in August at Los Angeles, She and her husband lived in Chicago before moving to California re-
